Research interests

Exactly solvable models of nonlinear collective dynamics in complex systems, with applications to Transformer-based generative AI—from a single attention head to a whole conversation—and to heterogeneous assembly–fragmentation processes on complex networks.

Education

2021 – 2027 **The George Washington University, Washington, DC**
PhD in Physics, expected May 2027
Advisor: Prof. Neil F. Johnson
Columbian Distinguished Fellow, Columbian College of Arts and Sciences

2017 – 2021 **Pembroke College, University of Cambridge, UK**
MMath (Part III of the Mathematical Tripos), 2021
BA in Physics (Natural Sciences Tripos), 2021; MA (Cantab), 2025
Foundation Scholar; Foundress Prize

Awards and honors

2026 SIAM Student Travel Award, SIAM Annual Meeting (AN26)
2026 Scholar, Edward A. Bouchet Graduate Honor Society
2026 Gus W. Weiss Prize for Outstanding Student in Physics, GWU
2024 Parke Prize for Excellence in Theoretical Physics, GWU
2022 Bennhold Family Award for best graduate-student teaching, GWU

Publications

Book

1. **F. Y. Huo**, P. D. Manrique, M. Zheng, and N. F. Johnson, *Introduction to Online Complexity: The New Social Physics of Extremes, Misinformation, and AI* (Oxford University Press, 2025).

Journal articles

2. N. F. Johnson and **F. Y. Huo** (equal contribution), Competition for attention predicts good-to-bad tipping in AI, *Patterns*, in press (2026).

3. N. F. Johnson and **F. Y. Huo**, Simple picture of how output from ChatGPT-like AI shifts from good to bad, *PNAS Nexus* **5**, pgag148 (2026).

Talks

2026	Online network dynamics ahead of offline shocks: The math of cohesion in human–machine–AI systems. Invited talk, SIAM Annual Meeting (AN26), Cleveland, OH, July 2026.
2025	Physical representation of attention, its properties, and beyond. POLS ENIGMA tutorial seminar, Department of Physics, GWU, April 2025.
2024	The new mathematics of online (mis)behavior. Invited talk, AMS Special Session on Complex Social Systems, Joint Mathematics Meetings, San Francisco, CA, January 2024.

Teaching

2021 – present	**Teaching Assistant, Department of Physics, GWU** Lead group discussions in SCALE-UP classes and in lectures; run tutorial-style office hours; grade weekly quizzes and review them in class. Develop quiz questions for PHYS 3127.
Fall 2023–26	PHYS 3127, nonlinear dynamics (final-year undergraduate; follows Strogatz)
Spring 2026	PHYS 1022, University Physics II (calculus-based)
Spring 2022	PHYS 1025, University Physics I for life sciences (calculus-based)
Fall 2021	PHYS 1026, University Physics II for life sciences (calculus-based)

Refereeing

Referee for *Physical Review Letters*, *Physical Review E*, and *Patterns*.

Media coverage

Patterns paper (2026): *The Independent*, *El País*, *Nautilus*, *Live Science*, *SecurityWeek*, *Decrypt*, and an InvestigateTV report carried by local television stations across the United States.

Earlier work: *APS Physics* (2023).

Computing and languages

Computing: Python (PyTorch, Hugging Face Transformers) for experiments on open-weight language models
Languages: English, Mandarin Chinese (native)
